It looks like the file you uploaded is the **same resume PDF** rather than a different template.

If your intention is to **keep this same layout** and only improve the content, I can absolutely do that.

Here's the improved content I recommend for your resume:

CAREER OBJECTIVE

Computer Science graduate with practical experience in Python, Data Analytics, and Web Development. Skilled in developing web applications, analyzing datasets, and building data-driven solutions using Python, Pandas, HTML, CSS, and JavaScript. Seeking an entry-level Software Developer, Python Developer, or Data Analyst role where I can contribute to innovative projects while continuously expanding my technical expertise.

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS, JavaScript

Libraries & Tools: Pandas, NumPy, Matplotlib, Jupyter Notebook, MS Excel, MS Office

Web Technologies: HTML5, CSS3, JavaScript, AJAX

Core Skills: Data Analysis, Data Visualization, Problem Solving, Team Collaboration, Time Management

---

PROJECTS

Influencers Ranking and Engagement Analysis (Final Year Project)

- Developed a Python-based data analytics application to evaluate and rank social media influencers based on engagement metrics.
- Cleaned and preprocessed datasets using Pandas and NumPy to improve data quality and analysis accuracy.
- Created visualizations and dashboards using Matplotlib to compare influencer performance and audience growth.

- Generated actionable insights to support influencer marketing and brand collaboration strategies.

Technologies: Python, Pandas, NumPy, Matplotlib, Excel, Jupyter Notebook

---

Seamless Healthcare Appointment Booking System

- Designed and developed a responsive web application for online doctor appointment booking.
- Implemented interactive user interfaces using HTML, CSS, JavaScript, and AJAX.
- Developed appointment booking workflows with form validation and confirmation features.
- Improved user experience through a clean, responsive, and easy-to-navigate interface.

Technologies: HTML, CSS, JavaScript, AJAX

INTERNSHIPS

Data Analytics Intern | EduNoVerse Tech Solutions

Feb 2026 – Mar 2026

- Analyzed social media datasets using Python and Pandas to identify influencer engagement trends.
- Performed data cleaning, preprocessing, and visualization to generate meaningful business insights.
- Built dashboards and analytical reports to support data-driven decision-making.
- Worked with Pandas, NumPy, Matplotlib, and Excel for data analysis tasks.

Full Stack Web Development Intern | SmartBridge

Jun 2025 – Aug 2025

- Learned Full Stack Web Development fundamentals through hands-on project implementation.
- Developed responsive web pages and applied core web development concepts in real-world scenarios.
- Strengthened knowledge of Python and web application development.

Python Programming Training | Progmaster Pvt. Ltd.

Oct 2023 – Jan 2024

- Developed a strong foundation in Python programming, including variables, functions, loops, data types, and problem-solving.
- Practiced implementing Python programs to solve basic programming challenges.

CERTIFICATIONS

- Python Programming Certification – Progmaster Pvt. Ltd.
- Python Fundamentals Certification – Progmaster Pvt. Ltd.

INTERESTS

- Data Analytics
- Web Application Development
- Learning Emerging Technologies
- Problem Solving

Additional recommendations

Your resume will look significantly stronger if you also:

- Add your **GitHub** profile (if you have one).
- Include **SQL** and **Git/GitHub** in the Skills section if you know them.
- Reduce the resume to **one page**, as this is generally preferred for entry-level software roles.
- Make your LinkedIn URL a clickable hyperlink in the document.

If you actually intended to upload a **different resume template** (for example, a Word design or Canva template), please upload that file. Right now I only have your existing resume, so I can't transfer this improved content into a new layout until I receive the template.
